Program Leaders Webinar Series

CAELI Community-Based Partners Innovation Hub Goals

- **Convene** a broad range of community-based partners across the state working in support of environmental literacy.
- **Elevate** the importance of environmental literacy CBPs in California.
- **Strengthen** the pathways between formal education and CBPs.
- Increase the capacity of CBPs to better serve students with high-quality, culturally relevant programs.
- **Determine additional field-level priorities**, which may include policy, funding coordination, tools and resource development, and innovations in environmental education to better address equity and inclusion and align with the needs of formal K-12 education.

Science, Ten Strands

EE Provider Landscape Survey Project Snapshot

METHODOLOGY

An online survey was developed and shared with environmental education organizations. Data synthesis, mapping, and design was led by Gen:Thrive.

ROLL-OUT

The survey was developed in spring of 2023 and remained open for approximately three months. Data cleaning and revisions were completed in winter 2023, with analysis conducted up until early November 2024.

PARTICIPATION

The invitation was open to any nonprofit, government agency or other entity that serves K-12 youth in California with programs related to environmental literacy, sustainability, green building, outdoor learning, climate, e-STEM, environmental justice, or related topics.

104 Service Providers conducted the survey and entered 492 programs. Both school-based and off-campus programs were captured in the data collection.

Peaks and Valleys Report

- We received 1,080 surveys (909 educators and 171 administrators) from across all 58 counties in California
- Responding educators teach approximately 80,000 students
- Representativeness checked by region
California County Superintendents regions and cross-checked against the 2020 Census
- Respondents on average scored 4.3 out of 5 on a pro-environmental attitudes scale.

Peaks and Valleys Report

Environmental nonprofits are a critical component of California’s statewide infrastructure.

Figure 13. Community Partnerships to Provide to Provide environmental PL For Educators (as reported by Administrators)

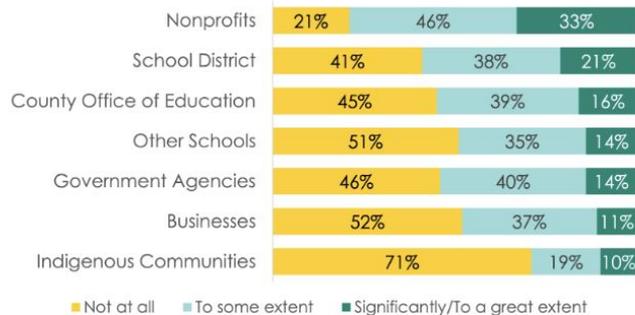

Figure 14. Community Partnerships to Provide Environmental Learning Experiences (as reported by Educators)

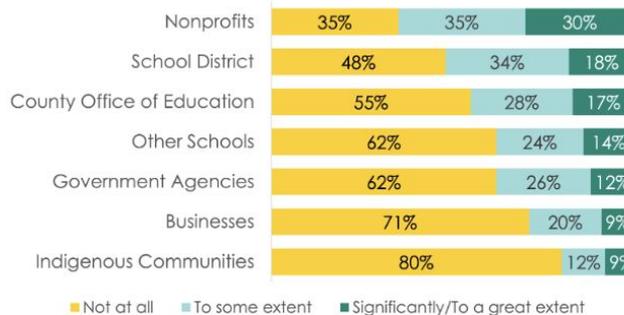

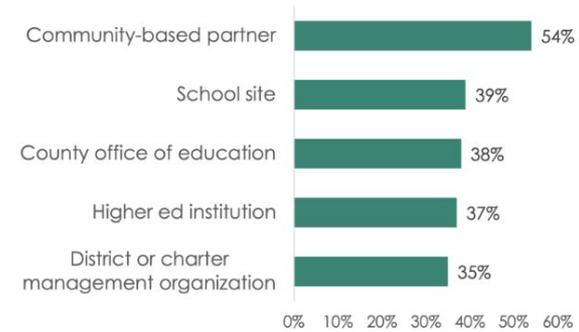

Figure 18. Percent of Educators Receiving Environmental Literacy Professional Learning From Different Providers

Peaks and Valleys Report

Students need more outdoor environmental literacy experiences.

Figure 4. Frequency of On-site Environmental Literacy Experiences

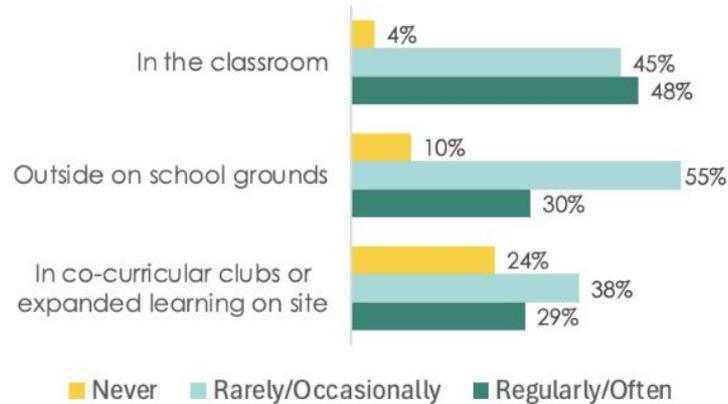

Figure 5. Frequency of Off-site Environmental Literacy Experiences

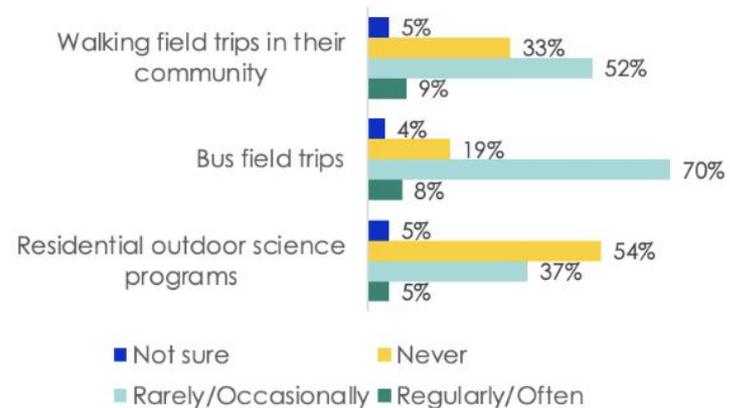

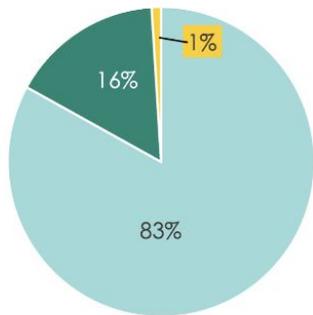

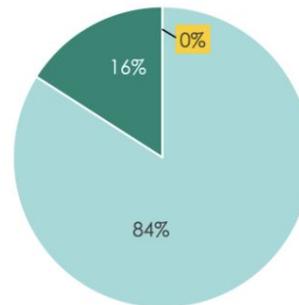

Figure 23. Educators' satisfaction with the current level of environmental literacy instruction

- I wish I could teach more about Environmental Literacy
- I am satisfied with how much I teach about Environmental Literacy
- I wish I could teach less about Environmental Literacy

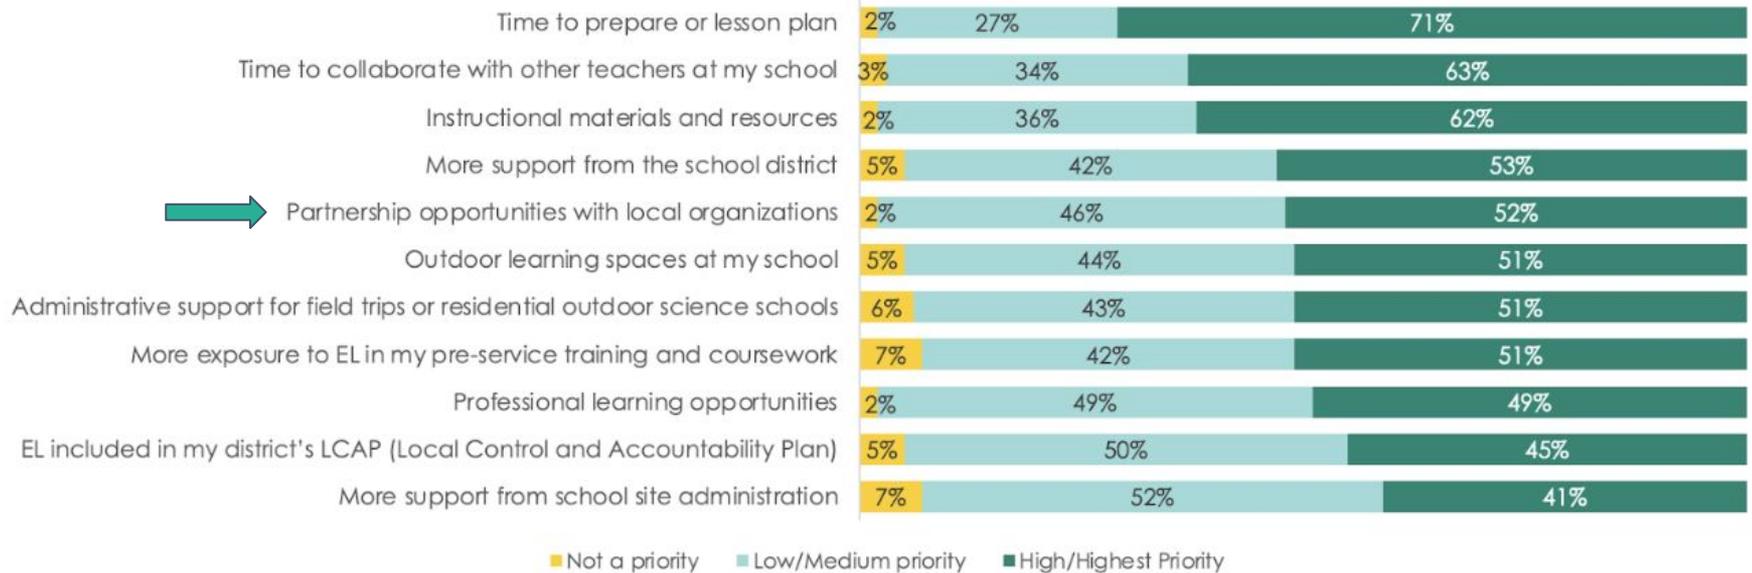

Figure 24. Administrators' satisfaction with the current amount of environmental literacy teaching happening in their schools

- I wish teachers at my school could teach more about EL
- I am satisfied with how much teachers at my school teach EL
- I wish teachers at my school could teach less about EL
