District Innovation Hub Goals

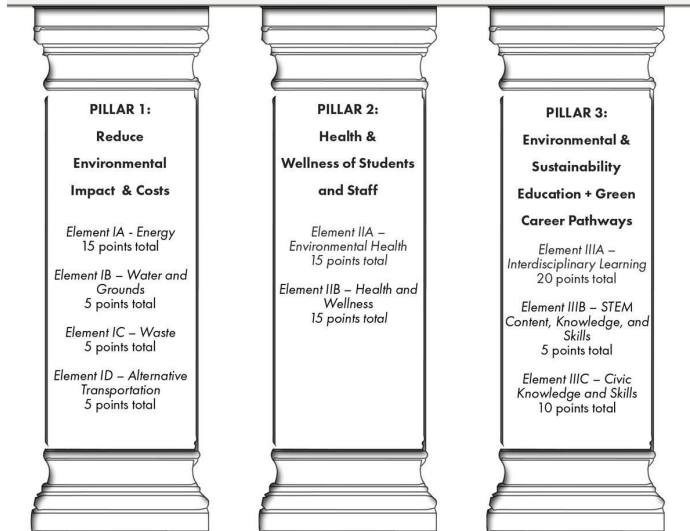

1. **Build a community** of district practitioners and partners.
2. Create, curate and **share** environmental literacy and sustainability **resources**.
3. **Build capacity** for district planning for environmental literacy and sustainability.
4. Cultivate, support, and **showcase leading edge exemplars**.
5. Research, design, and deliver the best green district support strategies.

Systems Approaches

4Cs Whole Systems Framework for Environmental and Climate Action in Schools

*Adapted from Sustainable Schools Project & Plymouth University; Andra Yeghoyan - 2013

 CAMPUS	 CURRICULUM	 COMMUNITY & CULTURE
<i>Operations across the buildings and grounds model sustainable and resilient practices, minimize disruptions for learning, and serve as a lab for learning.</i>	<i>Curriculum integrates Environmental and Climate Literacy as well as principles and practices for Solutionary Teaching and Learning.</i>	<i>Evidence exists within the “walk” and the “talk” of the school community for prioritizing sustainability and resiliency, and developing strategic partnerships with community based organizations.</i>

THE GREEN ECONOMY

How do you define a *green* economy?

A *green* economy is defined as an economy that is focused on the reduction of carbon emissions, resource efficiency, social inclusivity, and the prevention of the loss of biodiversity and ecosystem services.

Types of Green Careers

According to the [U.S. Department of Labor's Occupational Information Network](#) (2010), it is useful to breakdown the different types of green economy jobs into the following three categories:

- **Changing Skill Green Occupations:** These fields are adding new tasks or specialty areas because of the demand for green goods and services.
- **Higher Demand Green Occupations:** In these fields, the job duties are not changing but the occupation itself will probably grow because of the increased demand for green goods and services.
- **New Green Occupations:** These are jobs that are emerging because of green and environmental sustainability trends in various industries and sectors.

Why Prepare Students for Green Careers?

1. California policy and standards set up an expectation that we teach about climate and environmental issues.
2. Green careers will give the students I serve access to high wage, high growth job opportunities.
3. More students going into green careers is needed to mitigate and adapt to climate change.
4. The students I serve want to make a positive difference with the career they choose.

Which reason resonates with you?

CALIFORNIA

Call for Environmental Literacy in CTE

California Standards for Career Ready Practice

12. Understand the **environmental**, social, and economic **impacts of decisions**.

Career-ready individuals understand the interrelated nature of their actions and **regularly make decisions that positively impact** other people, organizations, the workplace, and **the environment**. They are aware of and utilize new technologies, understandings, procedures, and materials and adhere to regulations affecting the nature of their work. They are cognizant of impacts on the social condition, environment, workplace, and profitability of the organization.

Master Plan for Career Education

“By building these talent pipelines, the state can power economic growth and create more resilient communities in strategic sectors such as education, health care, and **climate**.”

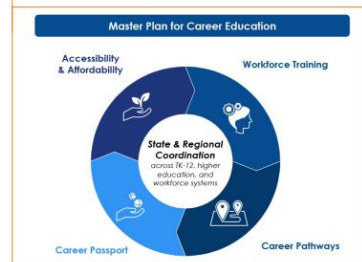

“A coordinated effort is crucial for capitalizing on programmatic funding opportunities and adapting to the demands of a workforce increasingly shaped by artificial intelligence and **climate imperatives**.”

California Master Plan for Career Education

EXECUTIVE SUMMARY

The Master Plan for Career Education will prepare all learners for the workforce of tomorrow by guiding California in its efforts to strengthen career pathways, prioritize hands-on learning and real-life skills, and advance access and affordability through streamlined collaboration and partnership so that all Californians can navigate toward career-sustaining jobs.

“Despite jobs requiring green skills increasing 8% annually over the past 5 years, green talent is growing by just 6%.

This imbalance will result in a skills gap by 2026”

At the current pace, **demand** for workers with green skills will surpass **supply**

Demand determined from share of green job postings. Supply determined from the share of members who have skills for green jobs.

Job Growth

“Green and energy transition roles, including Autonomous and Electric Vehicle Specialists, Environmental Engineers, and Renewable Energy Engineers, feature within the top fastest-growing roles.”

Future of Jobs Report 2025

Fastest growing and declining jobs by 2030

↑ Top fastest growing jobs	↓ Top fastest declining jobs
1 Big data specialists	1 Postal service clerks
2 FinTech engineers	2 Bank tellers and related clerks
3 AI and machine learning specialists	3 Data entry clerks
4 Software and applications developers	4 Cashiers and ticket clerks
5 Security management specialists	5 Administrative assistants and executive secretaries
6 Data warehousing specialists	6 Printing and related trades workers
7 Autonomous and electric vehicle specialists	7 Accounting, bookkeeping and payroll clerks
8 UI and UX designers	8 Material-recording and stock-keeping clerks
9 Light truck or delivery services drivers	9 Transportation attendants and conductors
10 Internet of things specialists	10 Door-to-door sales workers, news and street vendors, and related workers
11 Data analysts and scientists	11 Graphic designers
12 Environmental engineers	12 Claims adjusters, examiners and investigators
13 Information security analysts	13 Legal officials
14 DevOps engineers	14 Legal secretaries
15 Renewable energy engineers	15 Telemarketers

Note: The jobs that survey respondents report the highest and lowest net growth (%) by 2030.

Call to Action: Educating for a Green Economy

Call to Action Overview

CALIFORNIA
ENVIRONMENTAL
LITERACY
INITIATIVE

The Need

- Environmental systems are under critical pressure
- California policies are creating good green jobs
- Green career education is needed to inform, inspire, and empower students to thrive in green jobs

Part 1: The Need for Green Career Education

CALIFORNIA
ENVIRONMENTAL
LITERACY
INITIATIVE

The Vision

- Every job is a climate job
- Equitable access to quality green career information and skills education
- Students and job seekers are empowered to achieve California's climate and economic goals

Part 2: Vision for Educating for a Green Economy

CALIFORNIA
ENVIRONMENTAL
LITERACY
INITIATIVE

The Challenges

- Lack of a Shared Understanding of Priority Green Careers
- Issues with Coordination Among California's Agencies
- Limited Coherent Standards and Pathways
- Unequitable Access to Green Career Education

Which of these challenges do you most relate to?

Part 3: Challenges of Educating for a Green Economy

Challenge 1: Lack of a Shared Understanding of Priority Green Careers
Challenge 2: Lack of Coordination Across California's Agencies
Challenge 3: Lack of Coherent Standards and Pathways
Challenge 4: Lack of Equitable Access to Green Career Education

CALIFORNIA
ENVIRONMENTAL
LITERACY
INITIATIVE

Recommendation 1: Statewide Strategic Planning through Creating a Roadmap

- Establish a convening organization and leader to facilitate the creation of a Green Career Roadmap with an equity-informed lens.
- Gather labor market data that identifies Priority Green Careers.
- Foster statewide collaboration through the Roadmap process

Part 4: Recommendations for Educating for a Green Economy

Recommendation 1: Statewide Strategic Planning – Phase 1

Recommendation 2: Coordinated Implementation – Phase 2

The following recommendations are designed to facilitate research-based, coordinated, green career education and workforce development that is aligned with statewide industry needs.

Student Engineers Participating in the Municipal Water District of Orange County Water Distribution System Engineering Design Challenge

CALIFORNIA
ENVIRONMENTAL
LITERACY
INITIATIVE

Recommendation 2: Coordinated Implementation

- Collaboration at the state and regional level
- Attract & align funding to Priority Green Careers
- Regularly updated labor market research
- Standards and universal environmental literacy
- Teacher recruitment and capacity building, including training and curriculum
- Bridge the gaps in the green career journey
- Statewide green career awareness and student recruitment campaign

Call to Action

Educating for a Green Economy

Scan to download
the report

Achieving carbon neutrality in California by 2045 will require an estimated four million new green jobs. A roadmap for how we will fill the need and train students for these high-wage, high-growth careers does not currently exist.

The California Environmental Literacy Initiative has developed a call to action report to advocate for the creation of a statewide strategic plan to secure equitable access for TK-16 students to the high-quality green careers essential to a sustainable future.

Learn more about Green Career education and get involved!

Join the CAELI Green Career Education Initiative

- Create equitable access to the high-growth, high-wage green careers essential to creating a sustainable future.
- Facilitate the development of an environmentally-literate workforce by fostering the integration of career and environmental education into TK-16 Career Technical Education and other academic coursework.
- Find new ways to provide all students equitable pathways to high-wage careers, jobs, and trades that support a green economy.

Visit ca-eli.org to learn more

Learning opportunities on the CAELI Partner Portal

The Portal promotes environmental literacy by building educator awareness of community-based partners (CBPs) and their products and services to foster educator-CBP relationships for increased student enrichment and engagement.

By connecting educators with community-based and industry partners who can provide work-based learning and other environmental literacy opportunities, students can build skills and experience in green career pathways.

If you are a community-based or industry partner who offers green career learning opportunities, please add your programs to the Partner Portal today!

Breakout Rooms

What gives you hope?

- If you have one, tell a good news story:
 - *What gives you hope? Or...*
 - *I do this work because of/for...*
 - *Some examples of student success stories, good green career programs/pathways, resources, industry partners, community-based partners, etc.*

The Present

Given the imperatives for preparing our youth for a green economy:

- 1. Where are our current educational programs on track to support the fulfillment of these commitments?**
- 2. Where are the gaps in resources, investments, and methods?**
- 3. What supports could you use in the short term to get started/expand programs?**

CALIFORNIA
ENVIRONMENTAL
LITERACY
INITIATIVE

The Future

In thinking about an ideal future, what would an optimal educational ecosystem to support green career pathways look like?

What would this look like if we did it right?

What milestones along the way would show we are on the right path?

CALIFORNIA
ENVIRONMENTAL
LITERACY
INITIATIVE

Breakout Rooms

1. **What gives you hope?** Sharing stories of success.
2. **The Present:** Challenges & resources
3. **The Future:** Vision for full integration.
